EZ Flare Electronic LED Emergency Flares... All You Need in the Dark

- **Electronic**
- **Emergency**
- **Enforcement**
- **Environmental**
- **Economical**
- **Easy**

The EZ Flare Electronic LED Emergency Flare is a vital piece of equipment to ensure your safety. Whether you're a first responder, a boater, a driver of any vehicle or even a hiker, the EZ Flare should be part of your emergency plan. It provides a warning light for every type of emergency.

This emergency flare has proven to be one of the most versatile and trustworthy warning lights in the industry. The casing is small but powerful and is constructed of super high strength plastic with a flexible TPR shield which allows it to withstand the weight of several tons being dropped right on top of it or even driven over by a truck.

At 4.25" in diameter and 1.25" high EZ Flare is probably one of your smallest pieces of equipment. It is reusable, portable and has hundreds of uses.

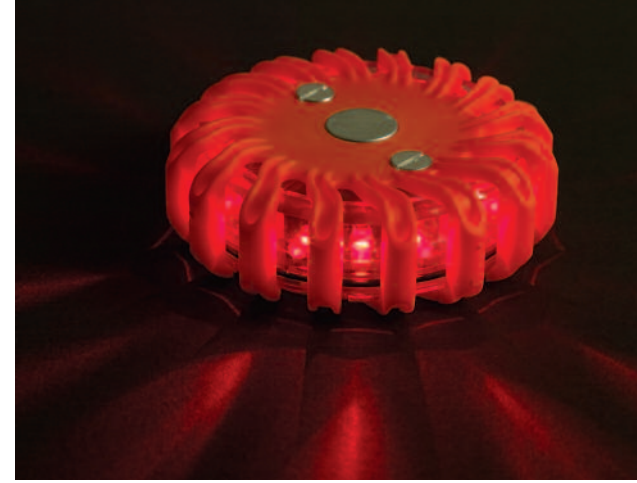

The EZ-Flare is intrinsically and environmentally safe, discharging no noxious or toxic fumes and produces no flames, sparks, or smoke. The lithium

battery will not leak. There are no chemicals to decompose or pollute the water or the air. EZ-Flare also may be used in extreme temperatures and is impervious to exposure to petroleum-based fuels. It's also waterproof and can float. Probably one of your smallest pieces of equipment being only 4.25" in diameter and 1.25" high, it is reusable, portable and has hundreds of uses. It uses one 3v Lithium battery that is included and has nine different light and flash settings. The battery will last anywhere from 8 to 100 hours, depending upon the flash setting you are using and it can be stored in your vehicle for up to 10 years.

EZ Flare General Use

The EZ Flare should be in every vehicle as part of a safety kit. In case of a breakdown, it is imperative that you are easily seen and visible to oncoming traffic. This flare is an economical alternative to conventional flares & reflective triangles.

- Being compact and highly visible it can replace bulky reflective triangles.
- Easy to use with the convenient smart switch on the face of the unit to turn on and off and cycle through the 9 flash and light patterns. EZ Flare remembers the last pattern used and restarts at that pattern.
- The flare contains a very strong magnet for placement on your vehicle but will not damage your vehicle's finish.
- For campers and hikers, the EZ Flare is an excellent device to mark campsites, and make you visible in the event you need a search and rescue team.
- For those living in remote or rural areas, the EZ Flare will mark your residence for emergency personnel, allowing them to quickly locate you and your family.

A highly visible Safety Warning Light visible up to 1/2 mile on the road or water at night. Daytime visibility is up to 100 feet.

- Unlike old-fashioned flares, the EZ Flare does not contribute to pollution or expose you and others to toxic fumes.

- It has 9 different light and flash settings with a battery that can last anywhere from 8 to 100 hours, depending upon the flash setting you are using.

Triple blink.....10 hours	Alternating10 hours
Double blink30 hours	"SOS"24 hours
Single blink100 hours	Solid on high.....8 hours
Rotate15 hours	Solid on low60 hours

EZ Flare As First Responder

The EZ Flare can be used in a multitude of situations by first responders to emergencies.

This flare is visible for up to ten miles from the air and can be used in a power failure situation. It can be used to mark personnel or victims, indicate helicopter landing zones, and can handle extreme temperatures. It acts as a lantern when used in the solid-on mode. Unlike a flashlight, the EZ Flare uses lithium batteries which will not leak.

It is an extremely tough and sturdy traffic safety device, designed to be used instead of incendiary flares, and as such, saves a great deal of money and enhances safety. Placing several EZ Flares in a pattern establishes a larger safety zone and reduces reliance on lighting bars and strobes.

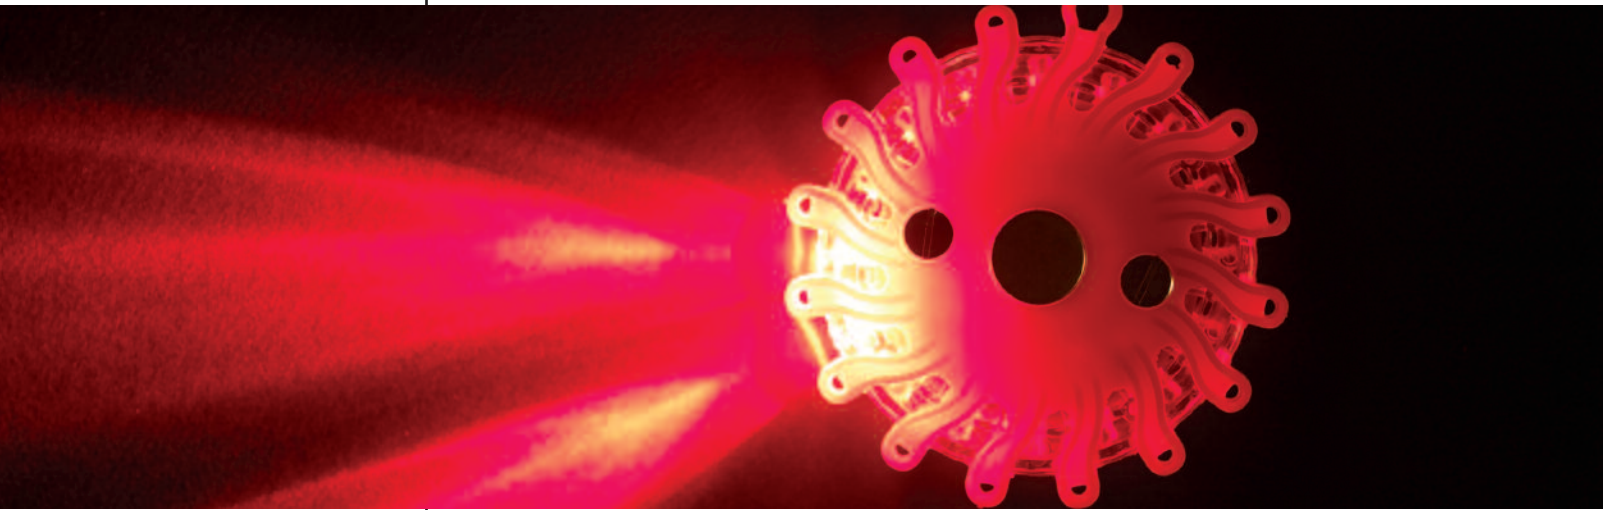

Perfect for Fleet Uses

The EZ Flare is crucial to fleet operators. It should be an integral part of a road hazard supply kit. Several can be used to increase safety zones in case of a breakdown in the dark. It can also be placed on the vehicle itself with its powerful magnet for even more protection and visibility. Along with fleet operators, the EZ Flare is an exceptional piece of equipment for tow truck operators. They can be placed on parked vehicles, on barricades and traffic cones, and used as a work light or lantern. Several placed in a pattern will allow oncoming motorists much more warning and visibility.

Nautical & Marine Uses for EZ Flare

The EZ Flare is invaluable when on the water. Since it's completely waterproof, it can mark any boat or watercraft. It easily floats near the watercraft to warn oncoming boaters, or they can be placed on the bow and stern as additional hazard lighting. Users can also add a lanyard and hang it from any of the boat's cleats. The EZ Flare is especially helpful for divers. Currently, divers have very few options for underwater lighting. It can be placed virtually anywhere on a diver's body or equipment to make sure that he is visible to others. It can also be used to mark floating landing zones.

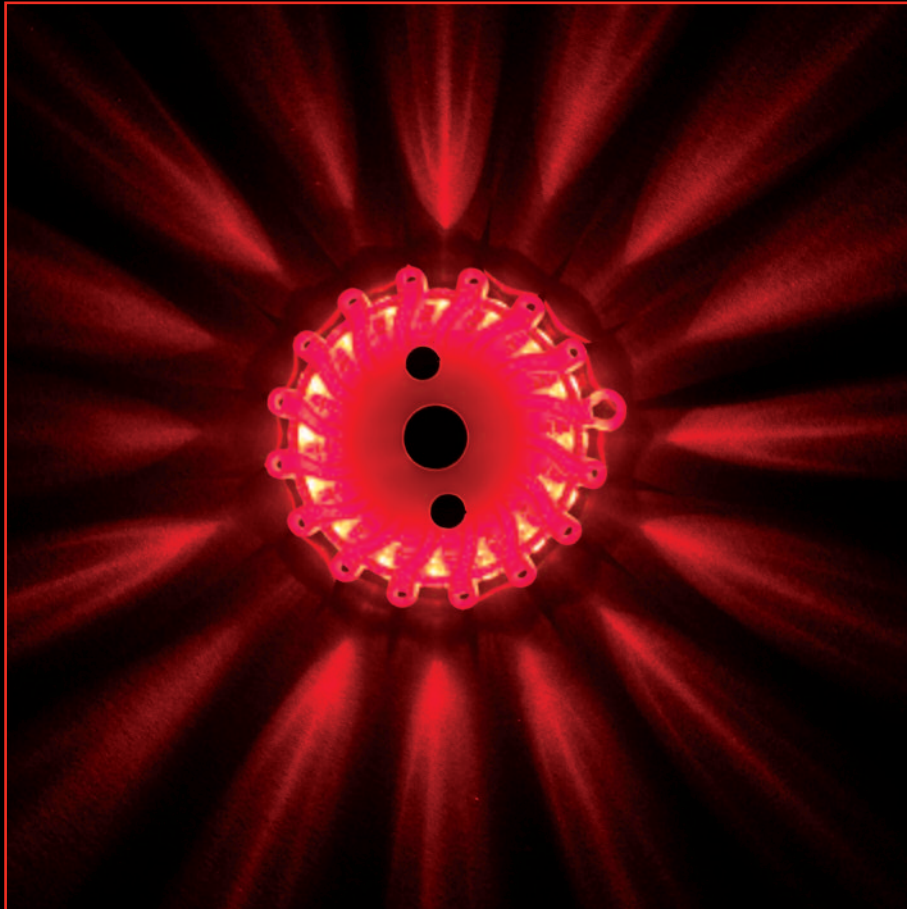

Use the EZ Flare for all emergencies including:

- Boating
- Fishing
- Camping & hiking
- Scuba Diving
- Jet Skiing
- Search & Rescue Operations

Also available in a convenient canvas light bag with 6 EZ Flares per bag. Now you are ready for any emergency.

**The EZ Flare has proven to be one of the most versatile and trustworthy
warning lights in the industry.**
