

Sunlight Visible 60 LED Bulbs

Part No. - LEDBR120A (Red) and LEDBA120A (Amber)

Ingram has designed a variety of daylight visible, low power LED bulbs for your alarm needs. The LEDBR120A and LEDBA120A fit Ingram's LX25 alarm light. In fact, these screw-in type bulbs fit any standard medium base (E26) socket. Unlike incandescent bulbs that fail catastrophically when the filament burns out or is broken, LED matrix designs will continue to light, should a single LED or a row fail.

NOTE: These bulbs can be flashed using analog or digital timer relays. See illustration on opposing page.

Features

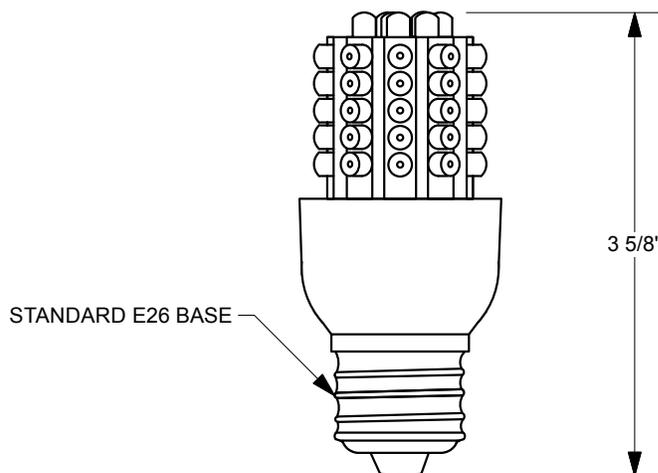

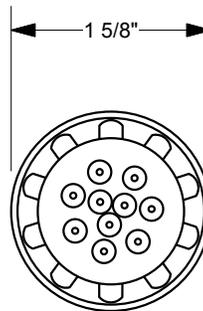

- Fits standard medium base (E26) socket
- Stays lit should one or several LEDs fail
- Reduced power consumption
- Durable - not as fragile as incandescents
- Available in red and amber
- 60 LEDs provide 360 degree visibility

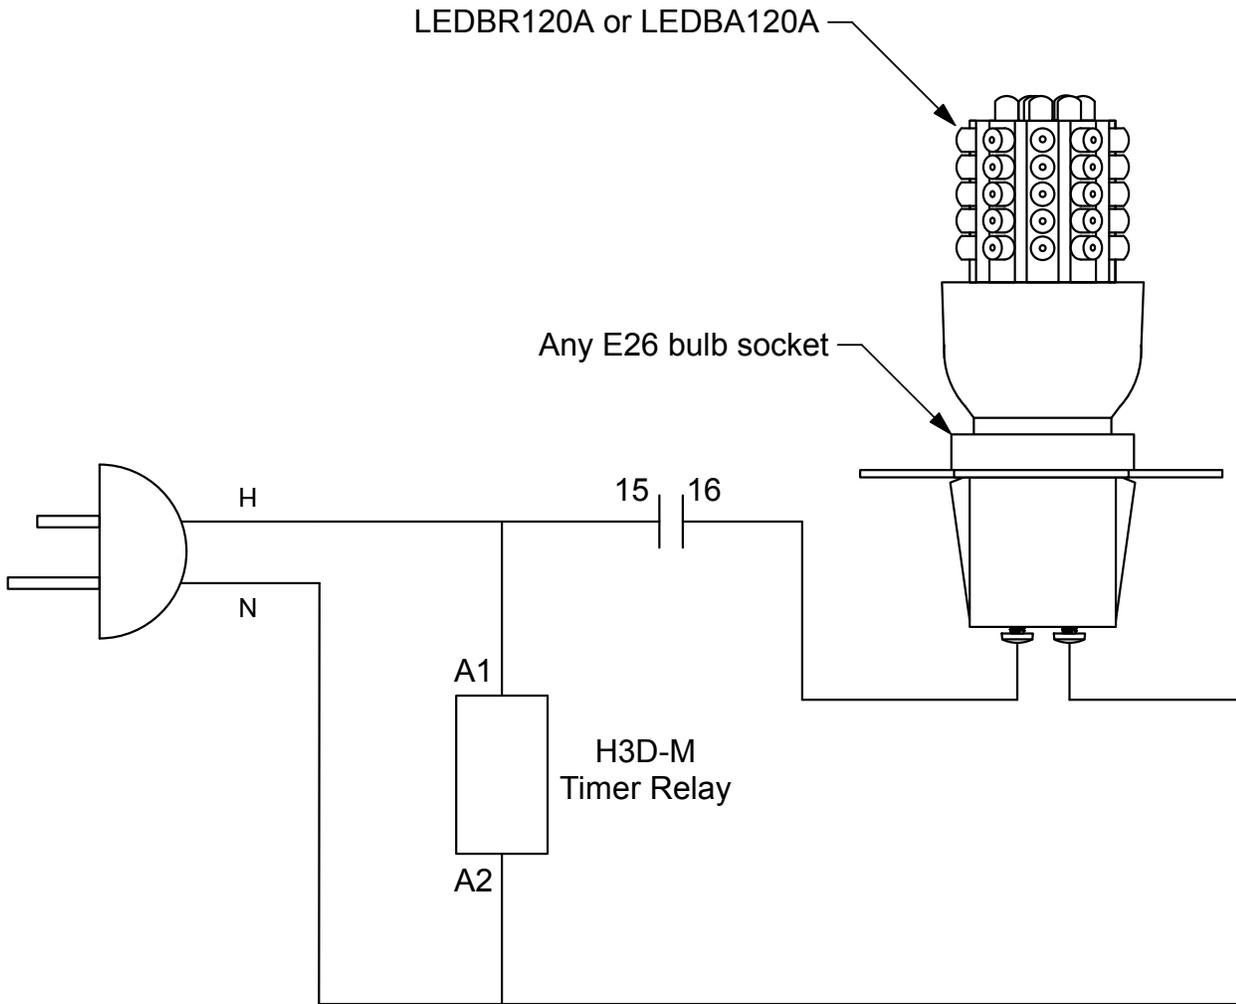

Technical Specifications

- Voltage: 120VAC
- Current draw: 17mA @ 120VAC

VISIBLE IN DIRECT SUNLIGHT

**Always remove power
before servicing any bulb**

Hook up for flash operation using timer. Example shown employs Ingram Products H3D-M multifunction timer relay. (Sold separately.) Set Mode for B or B2. (Flasher settings.) Flash rate can be adjusted from 1/10th of a second to 100 hours.
