

High Power MiniStrobe

Part No. HS Ministrobe: MSN120VAC

The Ingram High Power MiniStrobe is a super bright, daylight visible strobe light that can not be ignored. It is designed for use as an alarm beacon. It requires only a 3/4" knockout (1-1/16" diameter hole). It can be installed on panels up to 1/4" thick. We've modified the connection barrier to simplify installation. UL Recognized. For use in Type 3, 3R, 4, 4X, 12, and, 13 environments.

Features

- Super Bright - Daylight Visible
- Molded from GE Lexan
- Hermetically sealed for corrosion resistance and reliability
