

AC Strobe

Part No. : S120VAC

The Ingram S120VAC is a low cost, low profile strobe suitable for heavy duty applications. It is hermetically sealed and molded from shatter resistant plastic. This strobe is particularly useful in areas with high ambient noise levels where an audible signal may not be heard.

Features

- Xenon U tube
- Rated for 5 million flashes
- Low current draw
- Easy to install
- Molded from shatter resistant plastic
- Hermetically sealed

Technical Specifications

- Voltage: 120VAC
- Current Draw: 220mA max
110mA avg.
- Flashes per Minute: 40
- Standard incandescent screw in light base - easy to install
